THE LOGIC OF FAITH & THE COST OF UNBELIEF

Many think faith in Jesus Christ is an irrational leap into the unknown.

Others think it's just a personal choice of little consequence. But at our Tuesday and Thursday lunchtime talks this Autumn, William Taylor will be speaking from Matthew's Gospel showing us what Jesus is asking us to put our trust in, the solid evidence and why it matters. Each lunchtime will be a great opportunity to invite sceptics, enquirers and Christians.

Also, there are some other dates listed - please let others know about them. And please let me know if you'd like help in organising something more specific for your office this Autumn, during the Christmas period or during the London-wide workplace mission period (12-29 March 2018).
